AI24BTECH11005 - Bhukya Prajwal Naik

Question:

Find the directional and normal vectors of the following line: $x + y = 4$. **Solution:**

Information	Symbolic form
Given Line	$\mathbf{X} = \mathbf{h} + k\mathbf{m}$
Direction vector	\mathbf{m}
Normal vector	\mathbf{n}

TABLE 0: Final Information

The equation of the given line is:

$$4 = x + y \quad (0.1)$$

$$y = 4 - x \quad (0.2)$$

$$\Rightarrow \begin{pmatrix} x \\ y \end{pmatrix} = \begin{pmatrix} x \\ 4 - x \end{pmatrix} = \begin{pmatrix} 0 \\ 4 \end{pmatrix} + x \begin{pmatrix} 1 \\ -1 \end{pmatrix} \quad (0.3)$$

$$\mathbf{X} = \mathbf{h} + k\mathbf{m} \quad (0.4)$$

Hence we get the direction vector:

$$\mathbf{m} = \begin{pmatrix} 1 \\ -1 \end{pmatrix} \quad (0.5)$$

then we get

$$\mathbf{n} = \begin{pmatrix} 1 \\ 1 \end{pmatrix} \quad (0.6)$$

Hence, the direction vector of the line is given by $\mathbf{m} = \begin{pmatrix} 1 \\ -1 \end{pmatrix}$ and the normal vector is $\mathbf{n} = \begin{pmatrix} 1 \\ 1 \end{pmatrix}$.
